[PERSONAL GIT REPO](#) | [DWC SYSTEMS LLC - WEBPAGE \(IN DEV\)](#)

Professional Summary

Systems architect with over 5 years of experience designing and optimizing distributed systems. Proven success in managing large-scale operations and implementing automated frameworks that enhance reliability and performance. Skilled in building innovative platforms and eager to apply expertise in Golang and infrastructure automation to drive continuous improvements in compute environments.

Core Competencies

- **AI And Machine Learning:** Agentic GPT System Design, Recursive Prompt Optimization Loops, Prompt DNA Fingerprinting & Drift Analysis, Self-Diffing LLM Architecture, Strict-Mode LLM Validation (Schema/Type Enforced), Modular AI System Deployment, Goal-Linked Prompt Frameworks, LLM System Design (Agentic / Modular / Validated), AI Workflow Architecture (Prompt > Diff > Memory > Output)
- **User Experience:** UX Design
- **Infrastructure And Orchestration:** Virtual Machines, Orchestrators

Professional Experience

DWC SYSTEMS LLC

Jun 2025 - Present

Founder & Principal Systems Architect

Fort Worth, TX

- Built KaizenGPT, a self-evolving LLM system using prompt fingerprinting and recursive diff tracking to enhance system adaptability and demonstrate distributed systems design principles
- Developed visual orchestration logic to streamline goal 'refactor' 'test' 'relaunch' cycles, boosting workflow efficiency without compromising system reliability
- Designed strict-mode validation layers that filter hallucinations and enforce schema adherence, thereby increasing system reliability and accuracy
- Engineered dynamic memory management, session audits, and intent-to-goal traceability across 200+ prompt iterations, enhancing transparency and user experience in a distributed environment
- Consulted with clients on AI system integration and deployed modular GPT tools, aligning advanced system design with operational efficiency across various verticals

Ragle Inc. / Unified Specialties / Select Maintenance

Aug 2022 - Jun 2025

Fleet & Equipment Operations Manager

Fort Worth, TX

- Managed 580+ fleet and equipment assets across three entities, optimizing asset utilization and maintenance through systematic tracking principles
- Implemented full GPS deployment via Samsara and Gauge with 130+ geofences to enhance operational oversight and reliability
- Coordinated weekly payroll processing by managing onboarding workflows, data imports, and GL tie-outs to ensure timely and precise payroll operations
- Developed Python tools for automating VIN decoding, payroll formatting, and PDF extraction, exemplifying effective system design and process automation
- Filed county BPP reports and maintained linked Excel asset schedules, ensuring compliance through diligent systematization
- Generated analytical reports for driver accountability, work zone hours, and equipment utilization, contributing to improved resource management
- Deployed a web-based tracking system to monitor fleet operations, reinforcing data-driven decision-making and operational reliability

Ragle Inc. / Select Maintenance

Jan 2021 - Aug 2022

Payroll Coordinator

Fort Worth, TX

- Processed weekly payroll for 250-330+ Ragle employees and all of Select Maintenance
- Built a Google Sheets-based payroll continuity tool during a ransomware attack, maintaining payroll operations without interruption
- Filed 941s, 940s, W-2s, 1099s, and TWC reports, ensuring compliance with federal and state regulations
- Responded to wage/labor audits with 100% accuracy and no penalties
- Trained incoming coordinator and documented full SOPs, enhancing team efficiency and ensuring smooth transitions

Douglas J Wegner, CPA

Sep 2017 - Jan 2021

Staff Accountant / Tax & Payroll Administrator

Fort Worth, TX

- Managed full-cycle payroll and tax filing for over 30 SMB clients, ensuring timely and accurate submissions
- Filed taxes across TX, CO, MO, LA, OK, and KS, and prepared 941s, franchise tax, and sales tax, ensuring compliance with state regulations
- Created reconciliations, journal entries, and end-of-year reports, contributing to accurate financial records and reporting
- Supported QuickBooks and tax preparation workflows, enhancing efficiency and accuracy in financial processes

Education

University of North Texas

2017

B.B.A., Entrepreneurship

Featured Tools & Systems Built

KaizenGPT Prompt Engine

- LLM co-evolution tool with prompt diffing, memory tracking, goal-mapping, agent pipelines, and hallucination filtering. Powers recursive prompt workflows and modular GPT system upgrades.

Closest Job Matcher App

Ragle Inc. / Unified Specialties / Select Maintenance

- Geo-maps employees to nearest jobsite for annual AutoFringe reporting.

Geocoding GUI

Ragle Inc. / Unified Specialties / Select Maintenance

- Maps asset GPS to county/city/school district for compliance and reporting.

Equipment Rate Calculator

Ragle Inc. / Unified Specialties / Select Maintenance

- Calculates internal billing rates based on depreciation and operating cost.

VIN Decoder Utility

Ragle Inc. / Unified Specialties / Select Maintenance

- Uses NHTSA API to parse vehicle data for faster timecard and asset entry.

Timecard Formatter

Ragle Inc. / Unified Specialties / Select Maintenance

- Converts Foundation timecards into job table-ready data for fuel, billing, and work zone reporting.

PDF Paystub Extractor

Ragle Inc. / Unified Specialties / Select Maintenance

- Combines paystubs and per diem data into audit-ready files for Unified Specialties.

Icon Generator

Ragle Inc. / Unified Specialties / Select Maintenance

- Converts images into .ICO format for branding internal Python tools.

Certifications & Professional Development

- **Association of Equipment Management Professionals (AEMP):** Member since 2022
